

Identifying and delivering energy saving projects is what we do - make the most of ESOS and Ameresco to secure real business benefits

**1. Check whether you qualify** for ESOS:

- > 250 employees; or
- > €50m revenue and €43m in assets

**2. Scope total consumption**, which includes consumption of (a) industrial processes (b) transport and (c) buildings.

**3. Define significant consumption**, covering at least 90% of your energy streams, and appoint a **Qualified Lead Assessor**.

**4. Identify energy saving opportunities** in line with the ESOS regulations, incorporating

- An appropriate number of site visits
- Energy consumption profiles
- Life-cycle cost analysis
- Net Present Value of money

**5. Draft report and notify regulator.** Reports are to be signed off by a board member. Underlying data and analysis to be filed for future auditing by the regulator.

**6. Implement savings.** Detailed proposals for identified measures can be supplied, and accordingly implemented by our experienced project engineers.

## Key Benefits

Chartered Engineers and Energy Consultants as Lead Assessors

Investment grade reports suitable for board level approval

Over £3billion in energy solutions delivered to date (including predecessors)

Proven track record of energy saving project delivery across all sectors

Fully managed ESOS compliant service tailored to suit your needs

Independent – all technologies covered, no technology bias

## Let's get started...

### Milestone

**Dec. 2014**  
ESOS  
Qualification  
Date

### Deadline

**By Dec. 2015**  
Complete  
audits and  
notify  
regulator
