

ENERGY SAVINGS OPPORTUNITY SCHEME

PHASE II

ESOS requires all large organisations to carry out an energy audit of their buildings, processes and transport.

With the second ESOS deadline approaching in 2019, now is the time to start thinking about how your organisation is going to meet these requirements. Implementing effective energy savings projects identified in these audits will reduce operating costs and allow benefits to flow directly through to the bottom line.

Deadline: Notify Regulator by December 2019

As your trusted sustainability partner, Ameresco has all the resources needed to plan and execute a comprehensive energy programme that will create real, sustained economic benefit.

During ESOS Phase I, Ameresco surveys have identified

> 25%
Average
Energy Savings

> 150m
Capital Projects

> 30m
Total Year 1
Savings

Life Cycle Cost Analysis
For All Energy
Conservation Measures

Benefits

- High quality ESOS report that will meet regulatory requirements
- Focus and depth tailored to your organisation
- Suitable for board level approval and the regulator
- 100% compliant record in Phase I
- Pan European service (Energy Efficiency Directive article 8)

OUR APPROACH

ENERGY SAVING PROJECT IDENTIFICATION, DESIGN, AND IMPLEMENTATION IS OUR CORE BUSINESS

- **Realistic and comprehensive costing which includes design, enabling works and integration**
- **Robust business cases based on decades of project delivery**
- **Implementation through turnkey solutions or third party financed contracts with zero capital requirements**
- **Guaranteed performance of verifiable energy savings**
- **Using internationally recognised methodologies such as International Performance Measurement and Verification Protocol (IPMVP)**

WHY AMERESCO

It is important to work with a partner that has the experience, capability and resources to effectively deliver energy savings projects. This ensures ESOS is not another report sitting on a desk, but a list of actionable projects that can deliver savings from day one.

- **Fully managed ESOS compliance service**
- **Independent advice utilising best available technologies**
- **In-house certified Lead Assessors and Chartered Engineers**
- **Specialists in all areas of energy efficiency and distributed generation**
